Dear Hiring Manager,

I'm excited to apply for the Software Developer position at Coherent Corp. As an IIT Mandi Bioengineering student with a passion for coding, I believe I'd be a great fit for your team.

My journey has equipped me with the exact skills you're looking for - JavaScript, Angular, HTML, and CSS form the core of my expertise, while I've also worked extensively with NodeJS, MongoDB, Docker, and Git. What really draws me to Coherent is your emphasis on exploration and innovation - qualities that have defined my own approach to technology.

During my internship at Zemyst, I led teams implementing AI solutions and built a recommendation system that showcased my ability to work with complex systems. I genuinely enjoy diving into new technologies and frameworks, and I'm not afraid to try innovative approaches to solve challenging problems.

What sets me apart is my balance of academic excellence (highest CGPA in my branch) with hands-on experience troubleshooting and building applications. I'm equally comfortable working independently or as part of a team, and I'm fully prepared for your hybrid work environment.

Your ICARE values resonate deeply with me - I believe in building trust through integrity, sharing ideas collaboratively, taking ownership of my work, respecting diverse perspectives, and approaching each project with genuine enthusiasm.

I'd love the opportunity to discuss how my skills and passion could contribute to Coherent's exciting work. Thanks for considering my application!

Kind Regards, Sneha Chandna  
Applicant
